

Meenakshi Pillai

Salesforce Developer

Certified Salesforce Developer with expertise in Lightning Web Components, Apex, and automation tools like Process Builder, Workflow Rules, and Validation Rules. Proficient in creating custom solutions to streamline business processes and deliver seamless user experiences. Certified in Salesforce Administration, App Builder, and Platform Developer, with a passion for problem-solving and driving business success. Dedicated to leveraging Salesforce capabilities to create innovative, scalable solutions and enhance organizational efficiency.

Experience

- Associate Software Engineering** March 2023 - October 2023
Prestanda Consulting Noida, UP
 - Designed and developed Lightning Web Components (LWC) using JavaScript (ES6), HTML, and CSS, including a custom Day Parting Tool to calculate and save selected days and another LWC feature to enhance project functionality.
 - Created and optimized Apex Classes and Triggers for business logic, utilizing SOQL/SOSL for efficient data handling.
 - Managed code with Git and Bitbucket, ensuring efficient updates and progress within the main project repository.
 - Implemented Process Builder, Flow Builder, Workflow Rules, and Validation Rules to fulfill project requirements.
 - Coordinated with clients and CRM teams via JIRA to gather requirements, track progress, and ensure project timelines were met.
- Trainee Engineer Intern** January 2022 - June 2022
Simform Software LLP
 - Translated Figma designs into interactive web interfaces using React and Angular.
 - Optimized website performance and ensured cross-browser compatibility.
 - Collaborated with senior developers to implement best practices.
 - Contributed to project success and skill development through active participation.

Projects

- Custom Workflow Automation (2024)**
Technologies : Salesforce Developer Platform
 - Designed and activated a custom business process flow.
 - Built custom objects (e.g., Course, Subjects, Leads, Technology) with validation rules, workflows, and process builders.
 - Automated case assignments based on instructor availability.
- Space Shuttle Project Management (2024)**
Technologies : Salesforce Developer Platform
 - Developed a custom app to manage resources for building a space station.
 - Created objects (Station, Manpower, Supply) with validation rules and automated processes.
 - Designed dashboards and reports to track manpower utilization and supply costs.
- Ecommerce (Book Palace) (2022)**
Technologies : HTML, CSS, JS, React, Node, Express, MongoDB
 - In this project, an Online library shop allowing customers to purchase books by category, simplifying book buying.
- Bakery Management (Mom's Bakery) (2021)**
Technologies : HTML, CSS, JS, JSP
 - In this project, we've created an online bakery platform enabling customers to purchase a variety of bakery items. Additionally, an admin login feature allows for managing customer data and other administrative tasks.
